Database : MongoDB, PostgreSQL, SQLite

Tools : Git, Apidog, VS code, GitHub, Chrome Dev Tools, Vercel, Stripe,

Others: REST APIs, JWT Authentication, CORS, Version Control, CI/CD (git hub actions)

EXPERIENCE

Software Development Intern

NI Bloom Investment LTD, Norway (via team led by Nicolas Illies)

Remote | January 2025 – February 2025

Responsibilities :

- Built responsive UI for accounting software using Next.js, Tailwind CSS, and shadcn/ui.
- Created pages for Journal, Ledger, Balance Sheet, Profit & Loss, Trial Balance, Products, and Contact.
- Collaborated with developers and designers; attended daily meetings and shared progress.
- Contributed to internal docs by explaining accounting workflows in simple terms.
- Used GitHub for version control and assisted with PDF-ready UI designs.

PROJECTS

Pet Care

[Live link](#) | [Client Repository](#) | [Backend Repository](#)

Overview : Pet Care is a social media platform for pet enthusiasts to share tips, stories, and interact with posts, fostering a community for knowledge sharing and engagement around pet care.

Features :

- Implemented a user-friendly interface for sharing and interacting with posts.
- Enabled post reactions such as upvotes, downvotes, and comments for enhanced engagement.
- Built a PDF generator to export pet details like size and age for documentation.
- Designed a profile customization option resembling Facebook.
- Secured the platform using JWT-based authentication.

Technologies : Next.js, TanStack Query, TypeScript, Next Ui, Express.js, MongoDB, JWT, Mongoose.

Auto Bike

[Live link](#) | [Client Repository](#) | [Backend Repository](#)

Overview : An interactive platform for renting bikes with advanced features for users and a powerful admin dashboard for managing rentals.

Features :

- Designed an intuitive bike booking system with advanced sorting and filtering options.
- Developed a bike comparison feature to help users choose the best option.
- Implemented a gamified wheel spinner offering discounts to enhance user engagement.
- Enabled cost calculation for rentals upon bike return, ensuring accurate billing.
- Integrated secure payment processing using Stripe.

Technologies : React js, Redux, TypeScript, Ant Design, Express.js, MongoDB, JWT, Mongoose.

Educational Background

Bachelor of Business Administration

Department of Accounting and Information Systems,
Jahangirnagar University
2023-present

Courses

- Complete web development
- Next level web development

Languages

- English (Fluent)
- Bangla (native)
